MEDIA RELEASE

RInfra GETS LoA FOR NTPC's EPC PROJECT

PROJECT IS FOR FLUE GAS DESULPHURISATION (FGD) WORKS OF NTPC's 3x500 MW POWER PLANT IN JHAJJAR, HARYANA

ORDER VALUE OF PROJECT IS Rs. 567 CRORE

PROJECT AS PER GOVERNMENT OF INDIA'S MANDATE TO CONTAIN EMISSIONS BY THERMAL POWER PLANTS

Mumbai, February 11, 2018: Reliance Infrastructure Limited (RInfra) EPC has received the Letter of Approval (LoA) from National Thermal Power Corporation (NTPC) for Flue Gas Desulphurisation (FGD) works of its 3 x 500 MW power plant in Jhajjar, Haryana. The order value of the project is Rs. 567 crore.

The Scope of work includes design, engineering, manufacture, transportation to site, erection and civil work, and testing and commissioning of complete FGD system.

EPC Division of the infrastructure major had earlier emerged as L1 bidder amidst competition against leading EPC players including BHEL, L&T, and Mitsubishi Hitachi Power system.

The overall schedule for project is 20 months from the date of LoA for the first unit, with three months additional time each for the two subsequent units.

Considering the deteriorating air quality and associated health hazards, the Ministry of Environment, Forest and Climate Change (MoEFCC) had notified in year 2015 the revised standards for emissions to be met by thermal power plants. These require comprehensive retrofits with flue gas desulphurisation (FGD) system in the operating units as well as projects under construction.

The Central Electricity Authority (CEA) has identified about 300 operational units, totalling about 120 GW wherein FGD has to be installed in phased manner by 2022. This would entail an investment of about Rs. 50,000 crore.

RInfra EPC CEO Arun Gupta said, “Our strong credentials in FGD works are borne out by the system installed by us at Dahanu power plant long back in compliance with the statutory guidelines of the State Pollution Control Board to reduce SO2 emissions. Winning current FGD project further strengthens RInfra to lead in environment pollution control technologies and works. The company is well positioned in the emerging FGD market and poised to garner a sizeable market share.”

RInfra EPC’s current order book stands at over Rs. 12,000 crore.

Having positioned itself in the growing infrastructure sector with a large number of mega projects in the offing including metro rails, nuclear power plants, air quality control, marine infrastructure, railways, ports, dredging, etc., RInfra is keenly pursuing project opportunities worth over Rs. one lakh crore this financial year.

RInfra EPC has been shortlisted for some of the prestigious projects like the Bandra-Versova Sea Link, Mumbai Coastal Road, and the Mumbai-Nagpur Expressway. RInfra EPC has earlier executed large-scale projects worth Rs. 33,000 crore including the ultra mega power project (UMPP) of 3,960 MW at Sasan, Madhya Pradesh.

RInfra EPC is known for its unmatched capability in executing challenging projects, through the right mix of innovation, technology and robust processes to manage cost, time and delivering world-class quality.

Highways, Railways & Metros, Mega Civil projects, Water & Marine, Renewable in addition to Power projects.

RInfra is one of the pioneering names in the business with a project portfolio of 1,000 km of roads, 140 MW of solar power, 4,000 km of transmission lines and 9,000 MW of thermal power. The division offers a single point solution for execution of projects from "Concept to Commissioning" including project development, project engineering, procurement, construction and commissioning for clients. 'On-time' project delivery and cost efficiency coupled with an uncompromising commitment to quality form the cornerstones of the business.

With over eight decades of experience in project execution and delivery, RInfra has been successfully partnering with the nation to offer innovative, quality and on-time execution of complex mega infrastructure projects across diverse sectors and geographies.

Reliance Infrastructure's EPC business is certified for ISO 9001:2000 by BVQI and also for Integrated Management System (IMS) covering Environmental Management System (ISO 14001) and Occupational Health and Safety Management (OHSAS 18001).
